SECTION 1 - DEFINITION OF TERMS

For the purpose of this Tariff, the following definitions will apply:

Access Coordination - Provides for the design, ordering, installation, coordination, pre-service testing, service turn-up and maintenance on a Company or Customer provided Local Access Channel.

Additional Billing Increment - Additional Billing Increment is the rate element used to bill for the chargeable time when a call continues beyond the Initial Billing Increment. Additional Billing Increment begins when the Initial Billing Increment ends (e.g., with the second minute of a call for which the Initial Billing Increment is one minute). Additional rates apply to each Additional Billing Increment, or any fraction thereof, that chargeable time continues beyond the Initial Billing Increment. Thus, for Service with an Initial Billing Increment of one (1) minute, a call with an actual duration of two (2) minutes and one (1) second would incur the full Initial Billing Increment charge and the charge for two (2) Additional Billing Increments.

Administrative Change - A change in Customer billing address or contact name.

Alternate Access - Alternate Access is a form of Local Access except that the provider of the Service is an entity, other than the Local Exchange Carrier, authorized or permitted to provide such Service. The charges for Alternate Access may be subject to private agreement rather than published or special tariff if permitted by applicable governmental rules.

ANI - ANI (Automated Number Identification) refers to the specific and unique Calling Party's billing number delivered by a local exchange carrier to any interconnecting carrier for billing or routing purposes.

Application for Service - A standard Company order form which includes all pertinent billing, technical and other descriptive.

ASR - ASR (Access Service Request) means an order placed with a Local Access Provider for Local Access.

Authorization Code - A numerical sequence which enables a Customer to access Company's network to place a Call and which is used by the Company to identify the customer for billing purposes.

Authorized User - A person, firm, corporation or other entity that either is authorized by the Customer to

2.14. Method for Calculation of Airline Mileage

2.14.1. The airline mileage between two cities can be calculated using the Vertical (V) and Horizontal (H) coordinates of the serving wire centers associated with the Company's POP locations. The method for calculating the airline mileage is obtained by reference to AT&T's Tariff F.C.C. No. 10 according to the following formula:

the square root of:
$$\frac{(V1-V2)^2 + (H1-H2)^2}{10}$$

where V1 and H1 correspond to the V&H coordinates of City 1 and V2 and H2 correspond to the V&H coordinates of City 2.

Example:

	<u>V</u>	<u>H</u>
City 1	5004	1406
City 2	5987	3424

the square root of:
$$\frac{(5004-5987)^2 + (1406-3424)^2}{10}$$

The result is 709.83 miles. Any fractional miles are rounded to the next higher whole number; therefore, the airline mileage for this example is 710 miles.

The Company may, upon notice, make such tests and inspections as may be necessary to determine that the requirements of this Tariff are being complied with in the Installation, operation or maintenance of Customer or the Company equipment. The Company may interrupt the Service at any time, without penalty to the Company, should Customer violate any provision herein.

2.18. Timing of Calls

- 2.18.1. Long distance usage charges are based on the actual usage of the Company network. Chargeable time begins when a connection is established between the Calling Station and the Called Station. The establishment of the connection is determined, where available, by hardware answer supervision in which the local telephone company sends a signal to the switch or the software utilizing audio tone detection. When hardware answer supervision is unavailable and software answer supervision is employed, up to 60 seconds of ringing is allowed before it is billed as usage of the network. Chargeable time for a call ends when one of the calling parties disconnects from the call. If the Called Station "hangs up" but the Calling Station does not, chargeable time ends when the network connection is released either by automatic timing equipment in the telephone network or by the Company.

2.19. Rounding

- 2.19.1. In the event the total charge for a call includes a fraction of a cent, the cost shall be rounded up to the next highest cent.
